

PRESS RELEASE: Anderson Capital Partners Acquires The Galley, LLC

TULSA, OK, April 21, 2014 - Anderson Capital Partners, LLC., owned by R. Scott Anderson, a former Senior Executive Vice President of Dollar Thrifty Automotive Group, Inc., acquired The Galley, LLC on March 12, 2014. The Galley, LLC is the company that owns the award-winning Galley Workstation™, which was created in 2010 by long-time kitchen designer Roger Shollmier.

"I am very pleased that we were able to make this acquisition. The Galley® is an amazing product that is transforming the way people think about their kitchens," Anderson said. "Kitchens today have become the family meeting place as well as the central point used to entertain guests. Once you see The Galley being used, you immediately understand why it is so popular."

Anderson plans to implement an aggressive growth strategy that will be designed to increase nationwide awareness of the Galley line of products. *"Although many builders, architects, kitchen stores, plumbing supply companies, and designers nation-wide have discovered the products within the Galley Collection and are incorporating them into their projects, most people still don't know about it. We want to rapidly expand our distribution by adding high-quality dealers to the outstanding group we already have,"* Anderson said.

Roger Shollmier, a kitchen designer for 38 years, owner of Tulsa, Oklahoma-based kitchen design firm Kitchen Ideas and inventor of The Galley said, *"We are very fortunate to have a seasoned business executive like Scott purchase our company. He has a strong vision for what this company can become. We are proud of our Galley line of products and the extraordinary customer satisfaction levels we have with Galley owners."*

The company is headquartered and manufactures its products in Tulsa, Oklahoma.

About the Galley, LLC:

The award-winning Galley Workstation has truly reinvented the kitchen! Much more than a sink, it is a super-functional workstation and is an amazing addition to any indoor or outdoor kitchen. Cutting boards, colanders, a drain rack, and stainless bowls work together to create the ideal workstation to accommodate food preparation, serving and clean up in one convenient place. The Galley Collection works well in both large and small kitchens. The workstation currently comes in 4', 5 1/2', and 7' sizes and is also available in custom sizes. The line also includes a 3' clean-up sink and a 1 1/2' companion sink. The signature accessory packages come in white, black or bamboo. Together, the workstations, accessories and other signature products make up The Galley Collection.
